Instructional Design

A good training programme should have content that it is easy to deliver and produces consistent standards of learning. It should provide an efficient method of transferring skills and knowledge, and at its heart is excellence in instructional design.

Delta Learning Ltd provides a number of services to in aid the development of engaging and effective elearning programmes. Combining our ability to work closely with subject matter experts, with a deep understanding of differing learning needs, Delta Learning can design optimised elearning and blended learning programmes.

Developing bespoke, interactive learning solutions, allows the end users to achieve the training they need, in a way that allows them to learn at their own pace.

Elearning is a suitable medium for almost all types of training. The end users of the programmes we design range from chemistry students, through to manual workers, senior managers, and medical professionals.

Delta Learning can review existing elearning programmes, in terms of content and delivery and update them as required.

Working With Clients

Houghton Mifflin Harcourt: Modern Chemistry – Virtual Labs

'Virtual Labs' are an integral part of HMH's premium, interactive, online edition of its K-12 Modern Chemistry textbook. Virtual labs give students an opportunity to experience scenarios and experiments not usually offered in the classroom.

Working with subject matter experts and an international team of designers and developers, Delta Learning Ltd developed a number of scripts for this series to the publisher's high standards and exacting deadlines.

“ Despite the pace of creating these storyboards, I never panicked because I knew that Delta Learning could take even the barest bones of a draft from me and turn it into engaging, clear onscreen instruction. ”

Anne Bunce
SixRedMarbles

e-Learning for Healthcare (e-LfH)

e-LfH is a partnership between the UK Department of Health, the NHS and professional bodies that provides in-depth self-paced learning resources online. Over a period of four years Delta Learning contributed to a number of e-LfH projects including those for Anaesthesia, Pathology and Radiology and Active Medicine. Working with practitioners to design and build e-learning courses.

“ Having worked with Moya (Delta Learning) previously, when an opportunity arose on a new and challenging project, I did not hesitate in hiring her. I was already confident her abilities as an instructional designer and her keen eye for detail. I was further impressed on this most recent occasion by her high levels of productivity matched only by a commitment to quality. ”

Neha Baj, Project Manager, eLearning for Healthcare

Working With Your In-House Development Teams

Delta Learning has worked with a number of training development companies. Slotting seamlessly into creative teams we have provided our expertise as an extra resource when needed. Working with professionalism and diplomacy, our clients know they can depend upon Delta Learning to deliver high levels of creativity and productivity.

Delta Learning Has a Solution for You

Delta Learning Ltd has created instructional design for multinational and small/medium sized enterprises, as well as public sector organisations. With such a broad range of clients, we feel confident that, whatever your eLearning, or blended learning requirements, Delta Learning can help.

Our range of instructional design services includes the identification of learning goals and definition of course content; production of outline course design documents, and, writing detailed pre-production design documents, including course text, graphic design specification and script for voice-over.

We can also produce eLearning course or modules using rapid development tools such as Articulate Storyline.

Delta Learning can manage the development project on your behalf, liaising with subject matter experts, consulting with software developers, and ensuring all aspects are signed off and completed on schedule.

Our Learning Design Consultancy includes the learning needs analysis, development of a learning strategy, and recommendations for the most effective way of delivering results.

Why Use Delta Learning?

There are many reasons why clients return to Delta Learning again and again, but the most important one is trust. Our clients know they can rely on us to provide an excellent service, regardless of the complexity of the project.

Delta Learning builds this trust relationship with clients through demonstrating a commitment to quality and productivity. It's all about getting it right first time, on time.

We understand that the end users of the eLearning programmes we design differ greatly in terms age, education, and even English language skills.

Delta Learning's instructional design is based on the knowledge of what makes a good learning experience, and on the need of clients and the end users. We have the ability to understand complex and technical information and translate it into engaging training programmes.

We never impose solutions – everything Delta Learning creates is an outcome defined by client needs. Working with Delta Learning gives you the confidence that your eLearning or blended learning programmes will deliver the training goals you have set.

Efficient. Interactive. Engaging.
